Major exploration and commodity boom in progress driven by gold, PGM's and government larceny

Broken Hill Project, PGM-Nickel-Copper, New South Wales

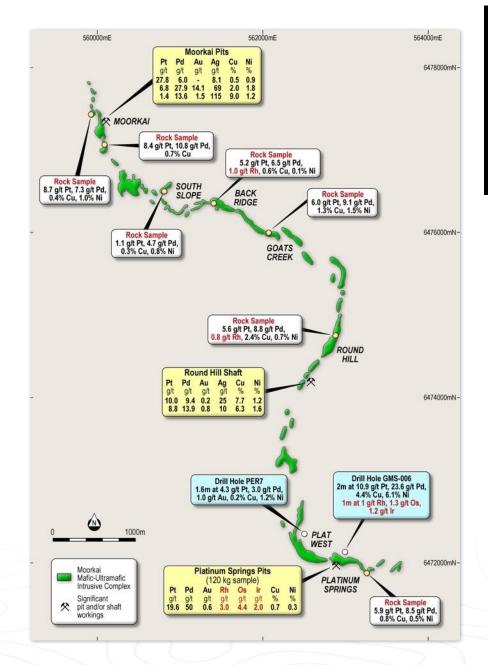

# High grades of all six PGM's

- 1. Major land position of 815 sq km in one of Australia's most prolific mining belts
- 2. High PGM grades including rare PGM's Rh, Os, Ru and Ir
- **3.** Multiple targets over 25 km for nickel-copper-PGM deposits
  - **Moorkai:** High grade rock chip samples over 9 km trend
  - **Platinum Springs:** high grade magmatic nickel-copper-PGE sulphide
  - Red Hill: Impact discovery of very high-grade PGE's
  - Little Broken Hill: poorly explored intrusion similar to Jinchuan and Voiseys Bay
- 4. Potential for million ounce PGM discovery with drilling in progress
- 5. Significant zinc-lead-silver potential

### Magmatic Ni-Cu-PGM sulphides Moorkai-Platinum Springs<sup>1</sup>

### **Platinum Springs**

0.6 metres at 11.5 g/t platinum, 25.6 g/t palladium, 1.4 g/t gold, 7.6% copper, 7.4% nickel, 44.3 g/t silver, 0.16% cobalt, 1.3 g/t rhodium, 1.7 g/t iridium,

2.0 g/t osmium and 0.8 g/t ruthenium from 57.1 metres down hole within

- Richest ore in Australia?
- Southern end of the 9 km Moorkai Trend dripping in PGE's

BUT: How to Focus?

moa

MINERALS

### Exploration for PGE's is DIFFICULT

They are impossible to see: so-called "**No see 'um**" zones

Not detectable by hand held XRF because of high detection limits

Conventionally require laboratory assay leading to excessive delays in progressing the exploration programs

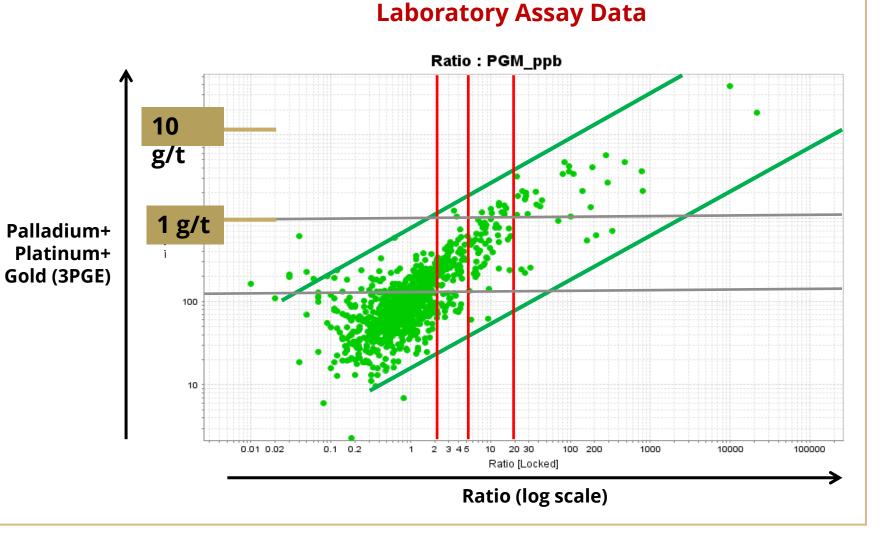

### 18 g/t "No see 'um" Zone Lac des lles

### Ratios R Us – A vector to high grade PGMs?<sup>2</sup>

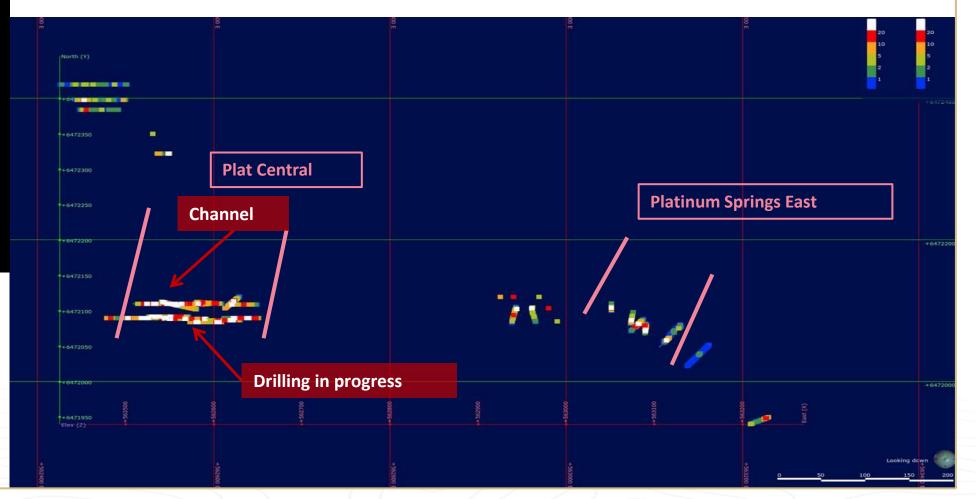

Impact breakthrough geochemical ratio that predicts PGE grade and which can be read with a hand held XRF instrument as drilling progresses

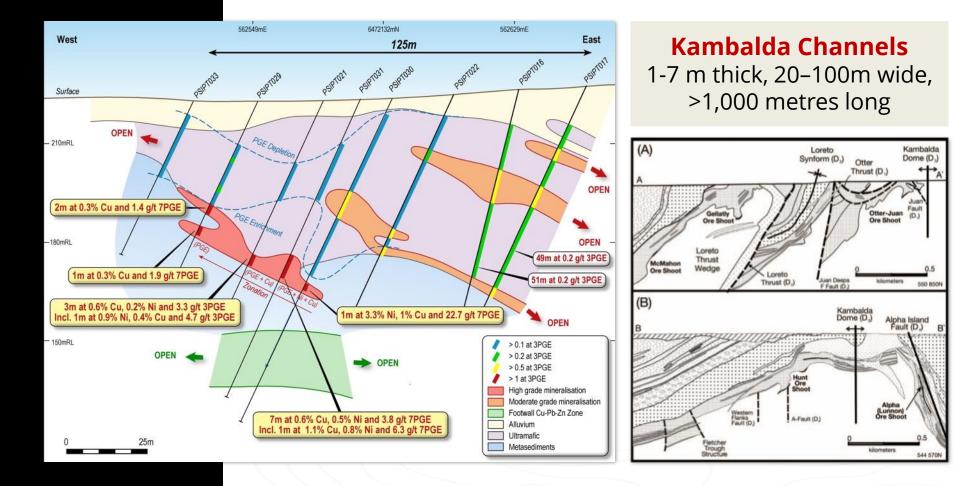

Ratio has allowed drill rig to be directed during the programme<sup>2</sup>

> First coherent zone of mineralization in 40 years of exploration!

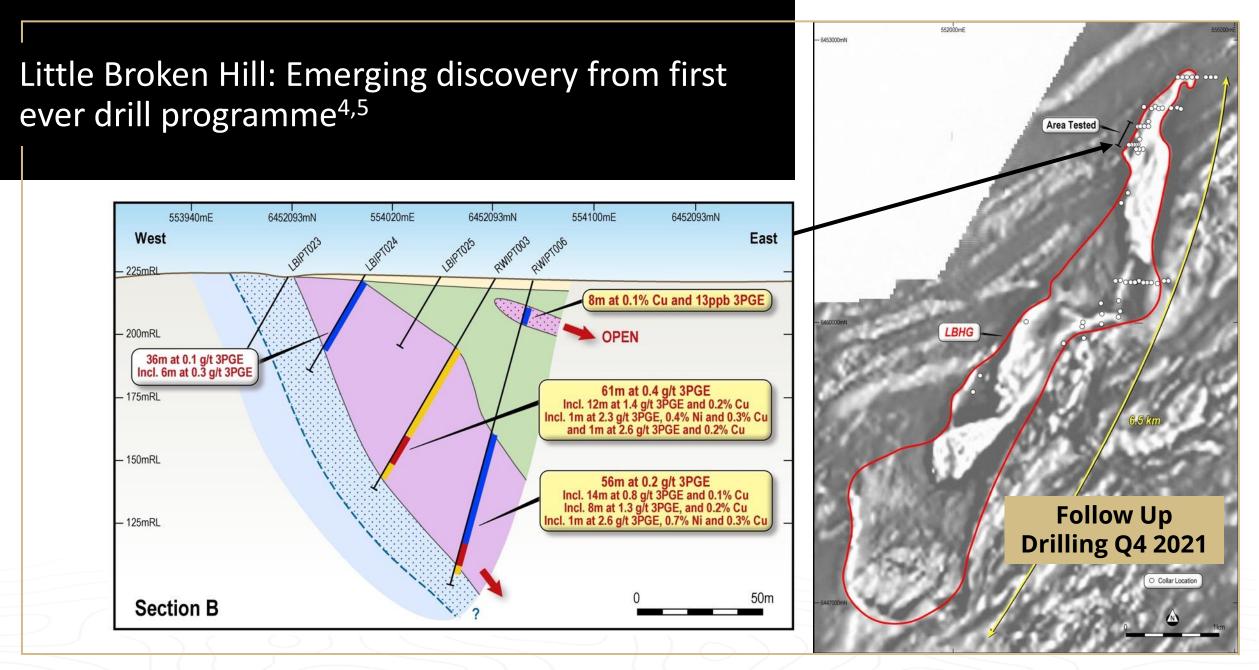

Impact Minerals | AMEC Investor Briefing July 2021

Ratio discovers a Cu-Ni-PGE Kambalda-style Channel at Plat Central<sup>3</sup>

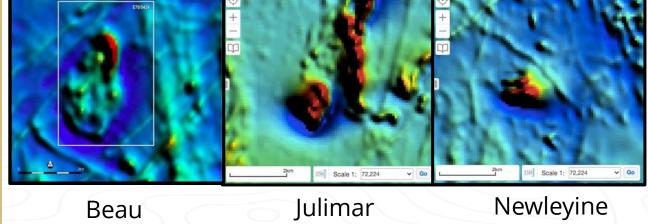

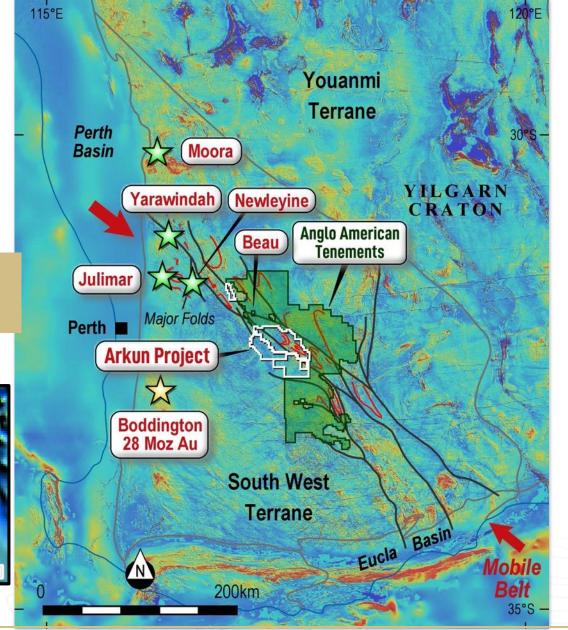

Arkun Project<sup>6</sup> Emerging PGM mineral province of SW Western Australia

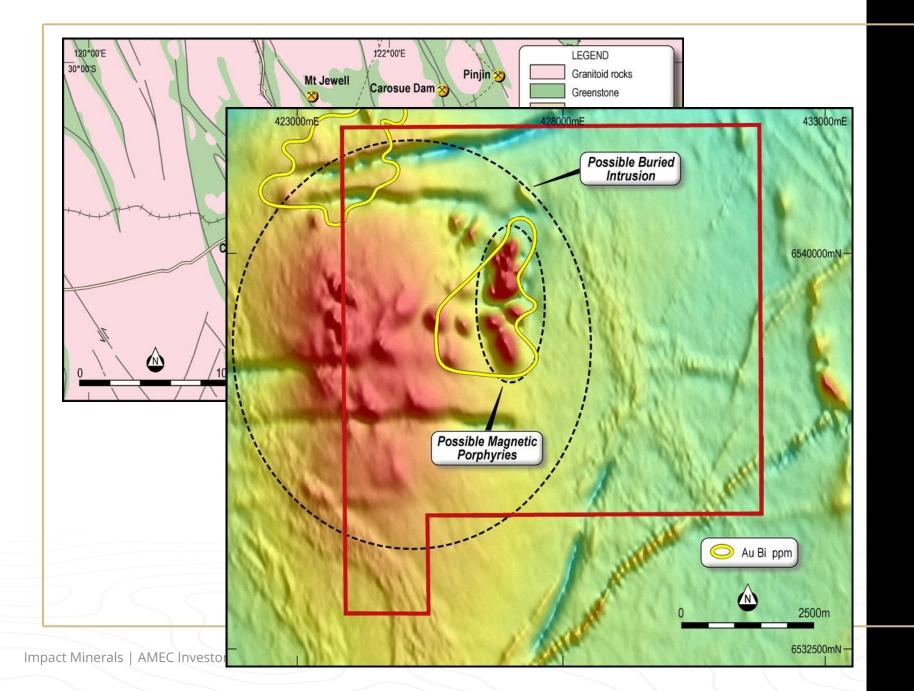

> Soil sample assays pending

MINERALS

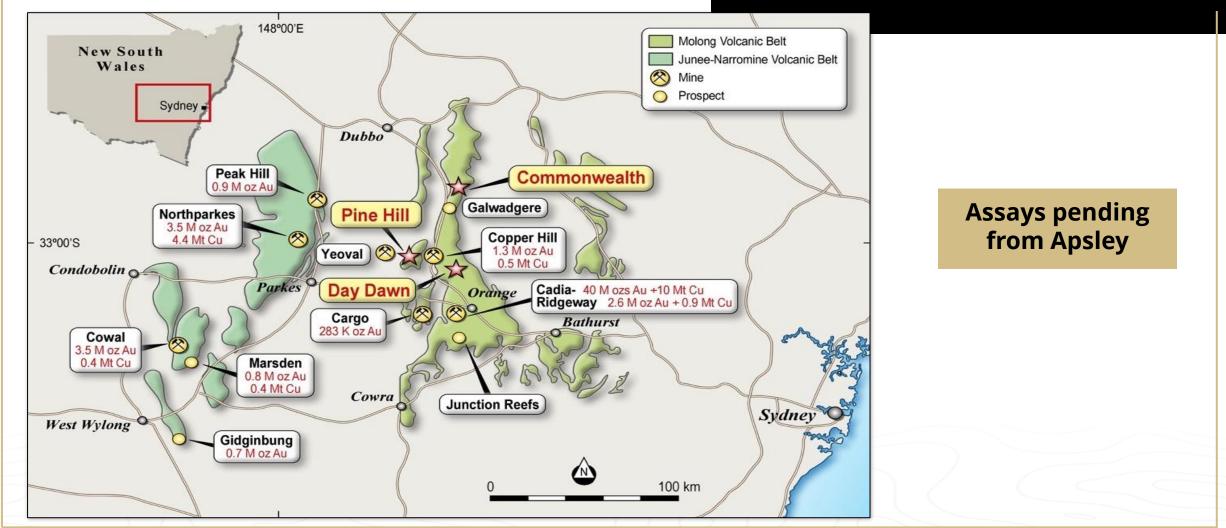

### Doonia<sup>7</sup> Yilgarn Craton, WA

### Commonwealth Project, Lachlan Fold Belt, NSW

# 2021 Vision: Next Steps and Strong News Flow

Drilling in Q3-4 2021

#### Broken Hill, NSW (IPT 100%)

- Follow up drilling at Platinum Springs, Red Hill and Little Broken Hill Gabbro
- Programme of 5,000 metres RC and diamond drilling

Drilling Q4 2021

#### Doonia (IPT 100%)

- First pass RC drilling of soil geochemistry anomaly.
- Programme of 3,000 metres

#### Arkun, WA (IPT: 100%)

First pass soil geocehmistry results pending

Target generation

#### Commonwealth, NSW (IPT: 100%)

- Assays pending
- Target generation in progress

# JORC Compliance

The information in this presentation relating to Exploration Results has been extracted from the following reports:

1. 23 February 2016	Very high grade PGM nickel-copper in massive sulphide at Platinum Springs
2. 26 October 2020	Vectoring in at Platinum Springs, Broken Hill, NSW
3. 2 December 2020	High grade Ni-Cu-PGE at Plat Central, Broken Hill
4. 9 July 2020	The gravity of the situation at Little Broken Hill NSW
5. 22 December 2020	Rockwell Prospect drilling results
6. 10 June 2020	Expansion of the Arkun Ni-Cu-PGE Project east of Perth
7. 17 November 2020	New gold project in the Eastern Goldfields: Doonia, WA

### What You Should Know

**Find out more –** This presentation is being used as a presenter's aid with summarised information. See Impact's other periodic and continuous disclosure announcements lodged with the Australian Securities Exchange, which are available at <u>www.asx.com.au</u> or <u>www.impactminerals.com.au</u>, for more information.

**Third party information –** Impact does not make any representations as to the accuracy or otherwise of third party information, including where projections are given.

**Forward-looking statements –** Within this presentation there may be certain forward-looking statements, opinions and estimates. These are based on assumptions and contingencies which are subject to change without notice and are not guarantees of future performance. Impact assumes no obligation to update such information.

**Taking action** – Please undertake your own evaluation of the information in this presentation and contact your professional advisers if you wish to buy or sell Impact shares.

#### **Competent Person Statement and JORC Compliance**

**Exploration Results:** The review of exploration activities and results contained in this report is based on information compiled by Dr Mike Jones, a Member of the Australian Institute of Geoscientists. He is a director of the company and works for Impact Minerals Limited. He has sufficient experience which is relevant to the style of mineralisation and types of deposits under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2012 edition of the Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves (the JORC Code). Mike Jones has consented to the inclusion in the report of the matters based on his information in the form and context in which it appears.

The ASX Releases referenced below on on the Impact Minerals website at <u>www.impactminerals.com.au</u>. The Company confirms that it is not aware of any new information or data that materially affects the information included in the most recent market announcement for each project, and in the case of Mineral Resources and Ore Reserves, that all material assumptions and technical parameters underpinning the estimates in the relevant market announcement continue to apply and have not materially changed. The Company confirms that the form and context un which the Competent Person's findings are presented have not materially changed from the original market announcement.
